Richardson / Dallas, TX | (903) 259-9470 | thuannguyen.vm@gmail.com | LinkedIn | GitHub

SUMMARY

Applied-AI researcher and data analyst with 2+ years building production ML pipelines and a published SEC 10-K fraud model at 82% accuracy on a 50K+ imbalanced dataset, 11 points over NLP baselines. Author of 11 conference papers on applied AI in finance, audit, and security, including 2 Best Paper Awards. Hands-on in Python, SQL, R, and SAS across statistical and predictive modeling. Presents findings clearly to technical and non-technical audiences.

TECHNICAL SKILLS

Programming: Python (pandas, NumPy, scikit-learn), SQL, R, SAS, JavaScript

Machine Learning & Statistical Modeling: predictive modeling, fraud classification, classification on imbalanced data, regression, A/B testing, hypothesis testing, time-series forecasting, cohort analysis, LLM fine-tuning (Llama), scikit-learn, PyTorch, TensorFlow

Data & Big Data: PostgreSQL, ETL/ELT pipeline design, Apache Spark, schema design, normalization, full-text indexing, data-quality validation, data lineage, multi-source integration

BI & Reporting: Tableau (Desktop Specialist), Power BI, Excel (advanced), Pandas, Matplotlib, KPI dashboards

Cloud & Tools: Azure VM (model training, fine-tuning, deployment), Linux/VPS, Git/GitHub, Conda

WORK EXPERIENCE

Renaissons LLC | Senior Data Analyst | Dallas, TX

June 2024 – Present

- Led tier-based pricing analytics with regression, cohort analysis, A/B testing, and scenario modeling; evaluated conversion, churn, and revenue to inform packaging across a platform serving 200+ paying customers.
- Developed and maintain KPI dashboards tracking 3 core metrics (signup, response time, and subscription rate) consumed weekly by non-technical leadership to surface trends and anomalies.
- Engineered a production LLM extraction pipeline transforming 1.5M+ unstructured documents into typed PostgreSQL fields with prompt engineering and anti-fabrication constraints, replacing brittle regex parsers.
- Built and maintain automated ETL pipelines ingesting structured, unstructured, and API-sourced data across 3 source types, applying standardized rules, mappings, and transformations for downstream modeling.
- Designed and enforce data-quality validation, schema-integrity checks, and reconciliation workflows across 2+ systems, investigating discrepancies and remediating root causes for accuracy.

East Texas A&M University | Applied AI Researcher | Commerce, TX

September 2023 – September 2024

- Engineered a two-agent fraud-classification model over a fine-tuned Llama LLM fusing financial ratios with SEC 10-K signals; hit 82% accuracy on a 50,472/421 imbalanced dataset, beating NLP baselines by 11 points.
- Fine-tuned and deployed a Llama LLM on Azure cloud VMs for fraud-classification research; author of 11 conference papers on applied AI presented at 5 conferences in 2026, including 2 Best Paper Awards (Academy of Business Research).

EDUCATION

East Texas A&M University | Master of Science in Business Analytics and Marketing | Commerce, TX | GPA 3.8 | June 2025

East Texas A&M University | Bachelor of Science in Business Analytics and Marketing | Commerce, TX | GPA 3.6 | April 2023

SELECTED PUBLICATIONS (11 TOTAL, 2 BEST PAPER AWARDS)

- AI-Powered Agents in Financial Security (two-agent fine-tuned LLM for SEC 10-K fraud classification). 25th Annual Security Conference, Las Vegas (2026).
- How Investors Delegate Authority and Accountability in Hybrid Human-AI Financial Advisory Systems. CENTERIS 2026, Procedia Computer Science (Elsevier). Corresponding author.
- Overcoming Barriers to Healthcare Interoperability: The Role of AI in Data Governance and Integration. Academy of Business Research, Summer 2026. **Best Paper Award.**
- Managing Human-AI Collaboration in Auditing Projects: A Systematic Literature Review. CENTERIS 2026, Procedia Computer Science (Elsevier). Corresponding author.
- Bridging AI and IT Security: AI-Powered Agents. Academy of Business Research, Spring 2026, New Orleans. First author.
- Full list: [Google Scholar profile](#).
